

**KINGS CANYON, NORTHERN TERRITORY, AUSTRALIA 2010**  
**INTERNATIONAL WILD EQUID CONFERENCE**  
**21 – 26 June 2010**

The Australian Brumby Research Unit presents the worldwide wild Equid conference which will be held at Kings Creek Station, NT, Australia on the 21st-26th June, 2010.

This is the perfect opportunity to mix science with travel, experience the Australian outback and Aboriginal culture in one of the worlds best tourist destinations. We have chosen an absolutely superb venue in the outback near Alice Springs in Central Australia.

This is an opportunity to meet equine scientists from Australia, New Zealand, America, Europe and Africa and experienced wild horses first hand.

**Due to the intimate nature of the conference and associated activities places are limited to 50 only. The first 50 places paid will be confirmed.**

**With Best Wishes  
The Australian Brumby Research Unit Team**

Above photographs were taken by ABRU at the research study site within 30 km of the conference venue.

### Conference quests and speakers:

- Chris Pollitt (Aus): *The wild horse foot*
- David Berman (Aus): *Ecology of feral horses in the central Australian desert*
